

THANAPORN HONGTHONG

UX/UI Designer

Thailand | thanaporn.h17@gmail.com | +6688-482-4500 | [LinkedIn](#)

SUMMARY

Graduated from Thammasat University focusing on Computer Science major and 1.5 years of experience in Front-end & Mobile Development, contributing to the UI/UX design of real products. Experienced in using Figma to create functional and visually appealing interfaces. I leverage my technical background to bridge the gap between design and implementation, ensuring user-centric designs that are optimized for seamless developer handoff.

EDUCATION

Thammasat University, Pathum Thani | 2019 - 2025

Bachelor of Science in Computer Science | Cumulative GPA: 3.15/4.0

WORK EXPERIENCE

NECTEC NSTDA, Pathum Thani

Software Developer (Front-end) & Research Assistant | Jan – Dec 2023

Full-time Contract (1 Year) | **Project: Traffy Fondue Extensions & Enterprise Solutions**

- **Figma-to-Development Scaling:** Collaborated with lead designers in Figma to implement and scale a bilingual (Thai/English) web interface into customized platforms for various governmental organizations, ensuring seamless accessibility for international users and bypassing LINE-specific platform barriers.
- **Enterprise UX Customization:** Designed and implemented a specialized Status Tracking LINE Chatbot for diverse organizations by optimizing user flows in Figma to simplify complex case-monitoring into an intuitive 5-step process, which improved internal operational efficiency by 20%.
- **Feasibility-Driven UI Development:** Contributed to a Figma-based design system by ensuring all UI components were aligned with technical feasibility, reducing design revision cycles by 25% and eliminating handoff friction during implementation.
- **Cross-functional Collaboration:** Maintained high design fidelity by facilitating seamless handoffs between Figma and Front-end development, improving overall feature delivery speed by 15%.

Mobile Application Developer | June – Dec 2022

Internship (6 Months) | **Project: Traffy Fondue**

- **User-Centric UI Development:** Developed and optimized mobile interfaces using React Native with a focus on accessibility, improving case management efficiency for government agencies by over 30% through simplified task-driven layouts.
- **User Research & Data Utilization:** Analyzed user feedback and pain points gathered from monthly training sessions to iteratively improve the user flow, resulting in a 20% reduction in user drop-off rate.
- **Iterative Design Strategy:** Collaborated with the field team to translate real user challenges into intuitive UI solutions, increasing overall user satisfaction scores through evidence-based design updates.
- **Design-to-Dev Synergy:** Leveraged JavaScript and UI design principles to build reusable components, reducing development time for new features by 15% while ensuring high design fidelity across the application.

AREAS OF EXPERTISE

- **Design Tools & Methods**
 - **Figma:** UI Design, Prototyping, Design Systems, Wireframing
 - **UX Principles:** User Journey Mapping, Interaction Design, Responsive Design
- **Technical Foundations**
 - **Core:** HTML, CSS (Tailwind CSS), JavaScript
 - **Libraries/Frameworks:** React, React Native
 - **Expertise:** Design-to-Code Feasibility, Version Control (Git)
- **Workflow & Collaboration**
 - **Project Management:** Notion (Task Tracking, Project Documentation), Draw.io (Flowcharts & System Diagrams)
 - **Communication:** Slack, Microsoft Teams, Google Meet
 - **Process:** Agile/Scrum, Design Handoff

ADDITIONAL

- **Soft skills:** Communication, Collaboration, Problem-Solving, Attention to Detail, Adaptability, Critical Thinking, Empathy, Time Management
- **Languages:** Thai (Native), English (Working Proficiency)
